1365 -25 Anniversary	24-25 Jun 05	Echo Valley

*First, I went following the scented grasses;
and then I returned pursuing the falling flowers.
The scented grasses and the falling flowers,
So lovely to recall.*

To walk-run positively on the grass, always alert, never astray.

Unknown certainly to our founding fathers, Seletar Hash (SH3) began a tradition of celebrating our centennial runs thus: 100, 200, 300, 400, 500 and 600th run. This numbering sequence was coincidentally in keeping with our other club tradition of awarding our members with a suitably engraved pewter trophy upon their accomplishing a centenary run. But run 666 (Hallowe'en) broke all that!

Thereafter followed the 777 and 888 run. Would there be a 999 run? I had predicted not in our 888 run souvenir magazine, and it did not come to pass. Instead, we had a 1000 run, then back to 1111 and 1313 – all out of mathematical sequencing as befits Seletar Hash confusion and mis-management. And now, this 1365 run to celebrate our 25th Anniversary! What's next is anyone's guess.

But who cares? Every number is a good number and every run a good run whenever Seletar celebrates. The last run and the first run – these are not one run. Just run ... and On! On! - **OPTO**
