

brought snacks and distributed them at the circle and everyone was munching away happily without knowing that these had been thrown away by the manufacturers!

The few out stations run that I went with him were truly fantastic. I mean, we always had fun on the bus while traveling, but Snake took it a step further. The first time we had him along was to Sg. Ujong. He treated this as a military expedition! Till all in the bus fucked him, then he loosened up a bit. With all the beers on the bus, Snake was tasked to conduct the Piss breaks. He did it so well that the bus driver wanted to leave him behind because his pee breaks was every 509 ms or so!

We reached Sg. Ujong and those poor bastards never knew what hit them! Firstly they had FATIMAH, me, then the next time they had MADONA, then this time SNAKE Eater! It was fun and it was memorial. He was my best worker during the celebration runs that we had to host. With his passing we have lost a legend and I, a true friend. But in true tradition, Snake has got his son, Lincoln, to join the Guzzlers and the tradition carries on. Welcome to Seletar, SOS!

NONOK was a "junior" member but nevertheless treasured hashman. Nonok was known for laying celebration runs, which he and Congo would always, volunteered. These pair of cunts when they lay a run they have absolutely no inkling of time and space! They would just go out there and lay some shit till their legs give out! I remembered the very first time they went out to lay the long run, Boo Chee Bye gave them his blessings and than regretted it. Even the Kwilohs could not make it back on time. The first runner was in a couple of hrs late and there were people still coming in 3 hrs later! Both these cunts quietly left Echo Valley when the Whip was looking to zap their asses! Nonok was also out spoken at the AGMS. If I am not mistaken we are having blackies on the run because of him. Nonok had came to this country following the handing of Hong Kong over and he was a forex trader and he given some tips which some of us had followed and ended up making some money. This was one strange Honkee! The only Cantonese speaking Bhai!

He was one of the few front running bhai who would break the checks and fuck up the slower runners together with Congo, and than get their arses freezed by the whip!

If you ever need a pair of hares to lay a ball-breaker run, this is the pair you look for!

Yes, Seletar has lost some wonderful and colorful characters. There was GIGI, who had resigned because of poor health. Many thought that his last days were last year! But he is still around. He may not be with us but he remembers all of you guys, some more than others. His mind is still has sharp has ever and he can still give you hell!
